PRE-OPERATIVE CATARACT SURGERY INSTRUCTIONS

1. You will receive a prescription for BESIVANCE, XIBROM AND PREDNISOLONE ACETATE 1%. **Start your eye drops 3 days before surgery.**

**Use the above drops as directed above in your RIGHT / LEFT EYE,
Including the morning of your surgery.**

BESIVANCE
(Store Upside Down)
Use 1 drop to the operative eye 2 times a day for 1 week after surgery then STOP.

XIBROM
Use 1 drop to the operative eye 2 times a day for 3 weeks after surgery then STOP.

**PREDNISOLONE
ACETATE 1%**
(Shake Well)
Use 1 drop to the operative eye 4 times a day for 3 weeks after surgery then STOP.

2. Your surgery will be at Hill Country Surgery Center on ___/___/____. A representative of Hill Country Surgery Center will contact you before your surgery for your arrival time. Your operation will take about 30 minutes, but plan to be at the surgery center for approximately 2 ½ - 3 hours. Please have your picture ID, insurance cards and a list of all your medications and dosages available when you check in.

If you are using glaucoma drops, continue taking your drops as you normally would, unless your doctor instructs you otherwise.

You must arrange for someone to drive you home after your surgery. **DO NOT** drive your car. You will be given medications that can impair your ability to drive.

Notify your doctor if you develop a cold, fever, respiratory infection, eye infection in either eye, or any change in your physical condition before surgery.

Wear clothes that are easy to change in and out of. Please do not bring any jewelry or valuables with you to the hospital.

If you have any questions or concerns about your surgery, please call Jodi at 528-1144.

RETURN APPOINTMENT AT THE CLINIC GIVEN ON ___/___/____ AT ___:____.
